

Environmental Policy Statement

Melrob Ltd is committed to the care of the environment and has implemented a Quality and Environmental Management System which satisfies the requirements of ISO 14001:2004.

The Melrob Group ensures that all its activities are carried out in conformance with the relevant environmental legislation, relevant industry Codes of Practice, and is also committed to Responsible Care and Responsible Distribution.

We seek to minimise waste by promoting recycling, reducing energy consumption, and where possible, to work with suppliers and contractors who align with our Quality and Environmental standards.

An essential feature of the Quality and Environmental Management System is a commitment to improving environmental performance and prevention of pollution. This is achieved by setting environmental improvement objectives and targets which are monitored and reviewed. The objectives and targets are publicised throughout the organisation.

The management of the Melrob Group is committed to providing the resources and facilities necessary for achieving objectives and fulfilling this standard and the Melrob Group Managing Director retains overall responsibility and operational control of the Quality and Environmental Management System.

Achievement of this policy is reliant on the commitment of all Melrob staff to uphold procedures, be proactive with improvement ideas, and to consider and manage risk and change.

This Policy and the obligations and responsibilities required by our Quality and Environmental Management Systems have been communicated to all employees, and this Policy is available to the public via our website.

Ian Melliush

Melrob Group Managing Director
